Cloud +

COURSE CONTENT

# CompTIA Cloud+ Introduction

'Cloud' solutions continue to dominate the technology market as their requirement continues to soar amidst remote working and telecommuting. The CompTIA Cloud+ certification validates the skills you need to maintain cloud infrastructure services. It shows that candidates have the skills to secure the cloud and have the hands-on skills to secure the environment. It is to be noted that the CompTIA Cloud+ certification is now compliant with ISO 17024 standards and is approved by the US DoD to meet directive 8570.01-M requirements.

## Overview:

The CompTIA Cloud+ certification places an emphasis on incorporating and managing cloud technologies as part of a broader system of operations.

It includes new technologies to support the changing cloud market as more organizations depend on cloud-based technologies to run mission-critical systems, now that hybrid and multi-cloud have become the norm.

It is the only vendor-neutral, performance-based certification.
