

 INFOSECTRAIN

CompTIA A+

CERTIFICATION & TRAINING

www.infosectrain.com | sales@infosectrain.com

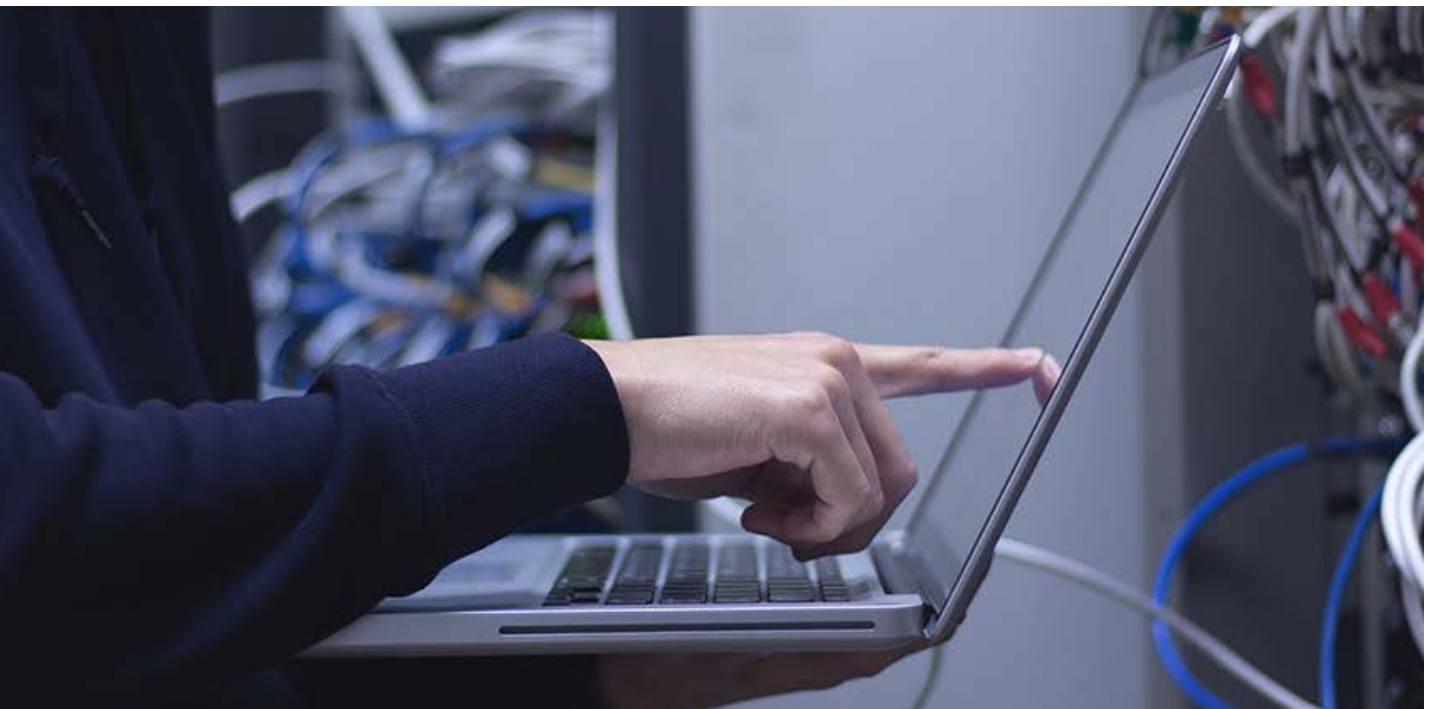

Course description

The CompTIA A+ certification is the industry standard for starting a career in information technology in today's digital era. Professionals with the CompTIA A+ certification have a track record of solving problems. They support today's essential technologies, such as security, cloud computing, data management, and more. The only credential includes performance-based questions to demonstrate that professionals can think on their feet and handle important IT support tasks in the heat of the moment.

International organizations and vendors dealing in hardware and software distribution have accepted the CompTIA A+ accreditation. The certification course improves the candidate's ability to perform installation, basic networking, maintenance, configuration, and troubleshooting. Security, environmental issues, communication, and security are also covered in the exam.

The CompTIA A+ certification offers broad knowledge of:

- All about computer hardware
- Troubleshooting and configuring mobile devices
- Basic network setup and configuration
- Troubleshooting hardware and network problems
- Cloud computing and virtualization

Target Audience

The CompTIA A+ certification training is exclusively designed for:

- Individuals interested in pursuing a profession in IT
- Individuals who want to get their CompTIA A+ certification

Prerequisites

There are no prerequisites; however, it is recommended to have:

- Working knowledge of computers
- Good internet connection
- 9 to 12 months of experience as an IT support expert
