

CompTIA IT Fundamentals ITF+

Certification & Training

Course description

CompTIA ITF+ assists professionals in determining whether or not an IT career is suited for them and developing a better understanding of IT.

- ITF+ is the only pre-career certification that helps students and career changers determine if they have information technology competency and if it is the right career path for them.
- ITF+ has been the only solitary certification covering all aspects of IT foundations, allowing non-technical professionals to understand IT better.
- ITF+ creates a framework for IT education for secondary and post-secondary students.

This course prepares you for the digital workplace by covering networking and cybersecurity essentials as well as hardware and software basics.

The CompTIA IT Fundamentals certification is intended to help you gain a deeper understanding of information technology. This course is ideal if you plan to pursue a career in IT or if your job requires a broad knowledge of IT. In addition to CompTIA IT Fundamentals, CompTIA A+ and CompTIA Network+ can be taken after it, and CompTIA Security+, with specific experience and training. So, if you are willing to become a professional join InfosecTrain's CompTIA IT Fundamentals certification training.

Target Audience

- Students seeking a career in information technology.
- Professionals in professions that necessitate a comprehensive understanding of information technology.
- Staff in IT-based companies who work in marketing, sales, and operations.

Prerequisites

You don't need any prior IT expertise; you'll learn all you need to know to clear the CompTIA IT Fundamentals test!
