## About Course

### The **CIPP/US (Certified Information Privacy Professional US) Certification**

**Training** from InfosecTrain provides a comprehensive understanding of the U.S. privacy and data protection landscape, equipping professionals with the knowledge required to navigate complex federal and state privacy laws. The course covers the foundations of privacy, the U.S. legal framework, and the enforcement of privacy and security laws, while also addressing government and court access to private-sector information, including law enforcement requests and civil litigation disclosures.

Learners gain in-depth insight into state privacy and breach notification laws, sector-specific data use regulations across healthcare, finance, education, telecommunications, and marketing, and the role of the Federal Trade Commission in cross-sector privacy protection. The program further explores workplace privacy obligations throughout the employment lifecycle, enabling participants to confidently manage privacy compliance, support organizational governance, and prepare effectively for the **IAPP CIPP/US certification exam**.

## Course Objectives

You will be able to:

- ✓ Understand the U.S. privacy and data protection framework
- ✓ Interpret key federal, state, and sector-specific privacy laws
