About Course

The ISO/IEC 27701:2025 Lead Implementer Certification Course is designed to equip professionals with the expertise to build and manage a Privacy Information Management System (PIMS) aligned with global privacy laws and enterprise risk frameworks. The course goes beyond understanding clauses, it focuses on:

- ✓ Designing a privacy governance structure
- ✓ Defining scope boundaries and PII processing contexts
- ✓ Establishing policies and accountability mechanisms
- ✓ Integrating privacy risk management with ISMS
- ✓ Selecting and implementing Annex A and Annex B controls
- ✓ Preparing documentation for certification audits
- ✓ Driving continual improvement and privacy maturity

By the end of the training, participants will be able to independently lead PIMS implementation projects within their organizations or as consultants.

Course Objectives

After completing this training, you will be able to:

- ✓ Design a full-scale Privacy Information Management System
- ✓ Translate regulatory privacy requirements into ISO-aligned controls
- ✓ Conduct structured privacy risk assessments
- ✓ Implement controller and processor controls
- ✓ Develop PIMS documentation framework
- ✓ Integrate ISO 27701 with ISO 27001
- ✓ Drive privacy governance transformation
- ✓ Prepare your organization for certification audits
- ✓ Lead PIMS projects confidently

Target Audience

- ✔ Privacy Officers/Data Protection Officer (DPO)
- ✔ Information Security Practitioners and Professionals
- ✔ Risk and Governance Managers
- ✔ Information Security Management System Consultants, Security Officers and Advisors
- ✔ Professionals seeking to become certified ISO/IEC 27701 Lead Implementers

Pre-Requisites

- ✔ Prior knowledge of the ISO/IEC 27001 standard is beneficial, as its integration continues to add value to the holistic governance of a Privacy Information Management System (PIMS).

Exam Information

We provide the exam with TÜV SÜD. Connect with our training advisors for detailed exam structure and certification process.

Course Content

PIMS concepts and ISO/IEC 27701 standard

- ✓ PIMS concepts and key definitions
- ✓ ISO/IEC 27701 high level structure
- ✓ The purpose, importance and benefits of PIMS
- ✓ PIMS framework requirements and control requirements for controllers and processors
- ✓ Privacy principles
- ✓ PIMS mandatory documentation

Scope, policy, and objectives formulation

- ✓ Formulating PIMS scope
- ✓ Formulating IS and privacy policy
- ✓ Formulating IS and privacy objectives and objective achievement plan

Privacy risk assessment

- ✓ Risk assessment process (Risk identification, risk analysis, and risk evaluation)
- ✓ Exercise and workshop on risk assessment

Privacy risk treatment

- ✓ Risk treatment process
- ✓ Controls for PII controllers (Annex A)
- ✓ Controls for PII processors (Annex B)
- ✓ Information security program
- ✓ Risk treatment options
- ✓ Formulating a Risk Treatment Plan (RTP)
- ✓ Statement of Applicability (SoA)
- ✓ Exercise and workshop on risk treatment

Performance monitoring and improvement

- ✓ Internal audit planning
- ✓ Management review planning
- ✓ Control effectiveness monitoring
- ✓ Continual improvement plan

Final examination

- ✓ Objective based and Open book
